

INPUT:

- An array of student names (Strings)
- A parallel array of final scores (integers, 0 – 100)

OUTPUT:

- Letter grade for each student
- Name and score of top-performing student
 - If there are students who got the same highest score, display them all
- Class average (mean of all scores)
- Count of students who passed (score is greater than or equal to 60)
- Count of students who did not pass (score is less than 60)
- A Boolean flag: did the class average fall below 70?

Grading Scale

Letter Grade	Score Range
A+	98 - 100
A	92 - 97
B+	87 - 91
B	81 - 86
C+	77 - 80
C	71 - 76
D	60 - 70
F	0 - 59
